REVIEWS

I always say my youthful appearance is half genes, and half a crack team of experts to keep me looking young! Dani is that team, working with my needs and budget. Delivery men don't believe my age when I give it. My partner says I have skin like a baby. Dani has many options that work for anyone

★★★★★

Lisa Wentworth

Great service provided by Danni. Extremely knowledgeable in her chosen profession. Very pleased with myself and my partners treatments. I'd highly recommend her and her practice.

Rob Cowlshaw

★★★★★

Dani is always very welcoming, friendly and always happy to chat whilst sharing her knowledge and love for the services and products she supplies. I can see me being a long lasting client.

★★★★★

Kerry Beighton

Dani is amazing, such a lovely lady who is excellent at what she does. Highly recommended

Rebecca Basha

★★★★★

I had Derma Fillers with Dani a few weeks ago and was absolutely delighted with the results. Dani listened to what I wanted and didn't want and the results were amazing. She knew I was nervous and did her best to keep me calm. Definitely worth 5 stars .

★★★★★

My Mission

My mission is simple:

To deliver individually personalised treatments, to meet the unique needs and desires of my clients.

I truly believe that "less is more".

An ethos I practise each day: tailoring bespoke programmes of tweaks to create results that transform the way my clients feel.

My role is to listen; to nurture our client-practitioner relationship; to build trust by managing expectations; to use my expertise and knowledge to help you achieve your goals; then to help you to prolong your results with product recommendations for a more natural approach to aging positively.

It is incredibly important to me that you stay true to you: never losing sight of just how beautiful you already are.

SKIN BOOSTERS

Skin boosters are injectable treatments designed to improve skin quality, hydration, and overall facial appearance. Hyaluronic acid in skin boosters draws water into the skin, providing deep hydrations, which improves skin quality. Skin boosters target multiple concerns, they plump and lift the skin, reduce lines and wrinkles and leave you with glowing, rejuvenated more youthful skin.

GLASS MISO AKA "BOTOX FACIAL"

A "Glass miso botox facial" combines a diluted solution of Botox/anti wrinkle with premium hyaluronic based skin boosters to improve skin texture and appearance unlike traditional Botox treatments that are injected. This no injection medical grade facial focuses on surface-level improvements, better skin texture, reduced fine lines, less oil production, minimised pores and enhancing overall skin radiance for a facial glow like no other!

RADIO FREQUENCY MICRONEEDLING

Radiofrequency (RF) microneedling is a powerful skin rejuvenation treatment that combines two technologies. Microneedling uses fine needles to create controlled micro-injuries in the skin, triggering natural healing and collagen production. Radiofrequency energy is delivered through those needles deep into the skin, heating the dermis to further stimulate collagen, elastin, and tissue tightening. Reduce signs of ageing, reduce scars and improve the skins firmness and texture.

MEDICAL GRADE FACIAL

A medical-grade facial is a result driven facial, a step up from a spa facial that uses more potent, science-backed products, advanced technology and tools to target skin at a cellular level for deeper skin transformation. Achieve long-term results what ever your concern.

MICRONEEDLING

Stimulate the body's collagen and elastin production to improve the appearance of the skin, reduce signs of ageing and improve wrinkles, acne scars and enlarged pores. Get smoother, firmer, and more youthful-looking skin with this minimally invasive treatment.

POLYNUCLEOTIDES

Polynucleotides, derived from salmon DNA, are used to stimulate collagen and elastin production, improving skin quality and appearance, they promote tissue repair, enhance cell turnover and increasing elasticity. This is a regenerative treatment to revitalise the skin at a deeper cellular level.

FIBROBLAST PLASMA

A simple yet effective way to remove unwanted skin tags, moles, excess skin and more.

VAMPIRE FACIAL

A vampire facial / PRP facial uses genuine science and our own body to give incredible facial rejuvenating results. Platelet-rich plasma is microneedled back into the dermis to stimulate collagen and stimulates cell renewal, resulting in improved skin texture, reduced appearance of wrinkles and fine lines, reduced appearance of scarring and pigmentation. Add nappage to deliver the plasma deeper and in concentrated areas!

5 POINT FACIAL

Multi layered collagen induction, a medical grade facial that ticks all the boxes followed by a relaxing facial massage. Dermaplaning to remove dead skin cells, microneedling to stimulate collagen and penetrate hyaluronic acid deep into the dermis, bespoke light therapy, with immediate visible improvements.

HIFU

HIFU stands for High-Intensity Focused Ultrasound. It's a non-invasive treatment that uses focused ultrasound waves. HIFU Stimulates collagen production, improving skin firmness. Gives incredible results with minimal down time, HIFU reduces wrinkles, lifts and tightening skin on the face, neck, and décolletage, eye area and body with minimal to no downtime. Results can be seen immediately and continue to develop over 2-3 months and can last up to a year or more.

COLLAGEN INDUCTION

Stimulating the body's natural collagen production for a more natural approach to anti-ageing. Multiple collagen induction therapies over time will reduce fine lines and wrinkles, dramatically reduce the appearance of acne scars and pore size and improve skin tone and texture.

DERMAL FILLER

To increase volume, reduce lines and the depth of wrinkles. Rejuvenating the face, offering immediate long lasting results.

ANTI WRINKLE INJECTIONS

To relax muscles, reduce fine lines and wrinkles. Botulinum toxin blocks nerve signals to targeted muscles. This reduces muscle movement, softens the appearance of lines and prevents new ones from forming.

SKINCARE

Choices of skincare to complement your aesthetic treatments. Each range designed to suit every skin concern, your ethos, and budget.
